EVENT CENTRE**

## WELCOME

Welcome to the 2025 Midlands Garden Rail Show.

Since the show started in 2002 it has grown to become one of the leading model railway events dedicated to garden railways.

We are again pleased to be able to present a diverse range of large-scale layouts in various gauges. Some layouts new to the show this year include Barley End, Putnoe Halt and Halesfield Traction Maintenance Depot whilst old favourites Gauge 1 Vintage Tinsplate Trains Group and 16mm Association Modular Layout will also be running for your enjoyment.

As you go round the show you will see many specialist suppliers offering a vast array of garden railway products including locomotives, rolling stock, track and accessories. Make sure you try to visit them all to see the full range of products on offer.

Our ground floor coffee shop can be found at the end of the main hall and our mezzanine restaurant can be found just above that offering breakfast, lunch and a great view of the action below!

We hope you will enjoy your visit.

# The Midlands Garden Rail Show – Packed with action!

## LAYOUTS

### 16mm Association Modular Layout

#### Stand: D

The 16mm modular layout standard allows members to build one or more modules and be able to come together to be a part of a larger layout at various exhibitions during the year.

### Barley End

#### Stand: B

Barley End is a rural country halt. The main employment of Barley End is the warehouse which receives barley by rail and transferred to road to deliver to the mill. Questions are always welcome.

### Chalfont

#### Stand: L

A Gauge 3 layout. It represents a small GWR branch terminus station and goods yard. A regular passenger service is supplemented by freight workings shunting the yard and local dairy. All locos are battery radio controlled and sound fitted and are built from kits, as is much of the rolling stock.

### G Scale Society Publicity Layout

#### Stand: K

The home of garden railways displaying various aspects of 45mm garden railways and the variety of scales that we encompass. Come and have a chat about all things G Scale.

### Gauge One Vintage Tinplate Trains Group

#### Stand: P

Vintage Tinplate trains both in Gauge 1 and the very rare Gauge 2. Most of the trains and buildings are pre-WW1, and some were also produced into the mid-twenties. The buildings and accessories are predominantly Bassett Lowke with a selection of other manufacturers period accessories.

### Halesfield Traction Maintenance Depot

#### Stand: N

Halesfield Traction Maintenance Depot (TMD) is an O Gauge fictional depot created in 2024. Starting with the steam loco shed and the goods exchange sidings, then moving on to the BR diesel depot extension. From steam to diesel, a mix for everyone.

### Lewiston

#### Stand: A

Lewiston has been off the circuit for several years, a great G Scale layout with a fiddle yard at one end and has a terminus station. It runs on Massoth DCC which controls all the locos and sound including the changing of point motors.

### Midsomer Norton

#### Stand: G

It is based upon the Somerset & Dorset joint railway station at Midsomer Norton just south of Bath. The locomotives and stock 'are passing through' representing railways all over the country during the last 200 years. Fuelled by methylated spirits, gas, coal or battery electric, rarely run at scale speed or timetable but have fun running live steam.

### Newchapel Junction

#### Stand: H

A finescale "O" Gauge layout representing the post-grouping period somewhere in the Yeovil area where the SR and the GWR ran together. The layout recreates the operation of a busy railway in its heyday with frequent arrivals and departures from the terminus station Newchapel Junction. The locomotives vary from main line express passenger and heavy freight engines to small branch line tank engines of both SR and GWR origin.

### Putnoe Halt

#### Stand: C

Putnoe Halt is a fictional G-scale model railway layout. The layout is based on a small country village station with a couple of goods sidings. Most of the trains and rolling stock used is of foreign origin which works well with the layout. Just because they are large trains you don't have to have a large space!

### Roche Junction

#### Stand: M

Roche Junction is on a main line where trains have to stop before continuing their journey on the single line. The line has freight going through the station.

## CLUBS

### Bromsgrove Society of Model Engineers

#### Stand: O

The society meets every Wednesday and Sunday at our tracksite within the grounds of Avoncroft Museum of Buildings. Track gauges from 32 mm G1 2 1/2 3 1/2 and 5" are available. The society has a thriving group of members building 16mm and G1 models there is also a significant group of members involved in 3D printing. Further details on our website and Facebook page. The society holds open days for fellow modellers in May and September, to which you are welcome.

### Coventry Model Engineering Society

#### Stand: J

The society is based at Ryton Pools Country Park where we have a club meeting room, 35m loops of 32mm and 45mm track plus a 600m loop of raised track for 3.5" and 5" gauge models. Our members are interested in most aspects of model engineering, including model locomotives, both steam and battery powered, traction engines, stationary engines, clocks and specialised workshop equipment.

### Gauge 3 Society

#### Stand: F

The Gauge 3 Society serves and supports those interested in making and/or operating 1:22.5 scale (13.5mm/ft) model locomotives and rolling stock running on 2 1/2 inch (63.5mm) gauge track. Live steam and electric types, with optional radio-control, are all included. Demonstrations of Gauge 3 wagon kit building.

### Leamington and Warwick Model Railway Society

#### Stand: I

OUTDOORS@LWMRS offers 90 metres of continuous running on three elevated 45mm tracks, suitable for Gauge 1, G and 16mm narrow gauge live steam and battery powered locomotives. It is in landscaped grounds with beautiful countryside views, excellent vehicular access, and parking, just minutes from the M40 junction 12.

### National 2 1/2" Gauge Association

#### Stand: E

The National 2 1/2" Gauge Association was formed in 1975 to try and halt the declining interest in this gauge of models. Its aim is to preserve access to articles and existing designs, to encourage new designs, and to supply drawings and castings no longer available from commercial suppliers.
