FREE SHOW GUIDE

**SATURDAY 16th &
SUNDAY 17th
MARCH 2019**

Open 10am – 4pm Daily

WARWICKSHIRE EVENT CENTRE

Sponsored by

THE MAGAZINE FOR MODEL ENGINEERS
**ENGINEERING
in Miniature**

**GARDEN
Rail**

WELCOME

Welcome to the 2019 Midlands Garden Rail Show. Over the years the show has grown to become one of the leading model railway events dedicated to garden rail.

We are again pleased to be able to present a diverse range of large scale layouts in various gauges. Some layouts new to the show this year include Chalfont, Buxworth and Battenberg, whilst several old favourites will also be running for your enjoyment.

As you go round the show you will see over 35 specialist suppliers offering a vast array of garden railway products including locomotives, rolling stock, track and accessories. Make sure you try to visit them all to see the full range of products on offer.

We hope you will enjoy your visit. Make sure to try the mezzanine restaurant for breakfast, lunch or tea - whilst still viewing and enjoying the action!

Meridienne Exhibitions LTD

CORSCALE ON SEVERN

HAMPTON END

NEWCHAPEL JUNCTION

The Midlands Garden Rail Show – Packed with action!

LAYOUTS

Battenberg

Stand: F

The idea of the late Mich Marwood of the 'G' scale society to show how a limited space can be found for a portable 'G' scale shunting puzzle.

Buxworth

Stand: N

Buxworth is a small town in the Midlands at the end of a short branch of the Midland main line to Derby. The branch is of course imaginary, but tries to recreate the Midland Railway scene in the mid 1930s.

The track layout is designed to save space around the station throat by using half scissors point work. The fiddle yard is unusual as there is no framework, the whole boards move on one leg, which has wheel at the bottom. Locomotives and stock are mainly Midland and LMS types.

Chalfont

Stand: L

Chalfont – Gauge 3 – represents a small GWR branch terminus station and goods yard. A regular passenger service is supplemented by freight workings shunting the yard and local dairy. All locomotives are battery radio controlled and sound fitted and are built from kits, as is much of the rolling stock. Gauge 3 at 13.5mm/foot is impressive. Chalfont has been built to show that a gauge 3 layout can be constructed in a reasonable space - I hope that you enjoy it.

Corscale on Severn

Stand: M

This layout is built to coarse-scale O gauge stands (7mm to 1 foot) to present modern tinplate trains produced in a 'retro' style. It recreates the kind of layout that might have been created before the Second World War. (The scenic accessories do indeed come from that era).

Fowlers Lake

Stand: E

The On30 model depicts the terminus of a branch of the Pacific North Western R. R. Fowlers Lake is also the junction for a portage railroad, the Fowlers Lake Railway and Navigation Co. The little river logging railroad also has access to the lakeside wharves and interchanges with the P.N. WRR.

G Scale Society Publicity Layout

Stand: I

We are a family orientated group who have fun with trains in the garden, or where we can primarily on 45mm track but on other gauges also. Approximately 1/24 scale.

Gauge One Vintage Tinplate Trains Group

Stand: R

Toy trains from 1900 to 1950. Proprietary makes, most in original pre-1923 grouping liveries. Over thirty locomotives with passenger and goods stock. Multiple tracks running continuously on a 300 square feet layout. Four individual collections combined as one. Questions welcome.

Hampton End

Stand: C

Hampton End was a small branch line link serving the small village of Hampton End. Most of the freight that used the line was fish from the quayside. After the closure of the line many years ago, a group of local rail enthusiasts reinstalled the tracks & buildings & purchased a few foreign engines & stock. Most week-end trains can be seen running. The buildings are from BR days. This international flair works well.

The branch line was the 3rd modification to Hampton End over its 10 years of exhibiting. The branch line serves a small village where it terminates with a run-around loop. Hampton End is sponsored by Glendale Junction and supported by fyna vehicle hire, 01604 753931.

Questions are welcome at all times.

Mwch Grumblyn

Stand: A

The layout is a typical small country railway where the models represent 2ft or 3ft gauge narrow gauge trains, modelled at a scale of 16mm/ft or 1:19 scale. The club members operating the layout have a wide range of skills ranging from novice to highly skilled model engineers and as a consequence you will see models that have been purchased or completely built from raw materials. Our tastes are diverse, so you will see trains from the UK and overseas. Please stop for a chat, we are here to entertain.

Newchapel Junction

Stand: K

Newchapel Junction is a large finescale "O" Gauge layout representing the post-grouping period and based somewhere in the Yeovil area where the SR and GWR ran together.

The layout is entirely semaphore signalled, and all moves are correctly signalled. Moves between Newchapel Junction Station and the circles are controlled by electric train describers the signalling at the branch line terminus is controlled by a mechanically-interlocked lever frame. We create the impression of a busy railway in its heyday with frequent arrivals and departures from the main station to either the main-line circuit, where trains can be seen running at speed, or to the branch line where life is a little more sedate.

The locomotives vary from large main-line express passenger types to humble tank engines of both SR and GWR origin

Please visit our website at www.newchapeljn.co.uk

Stanley Midland – Gauge One Layout

Stand: J

Presented by the Midland Group of The Gauge One Model Railway Association. This layout is modelled on a fictitious main line station during the steam era, with island platform, goods yard and engine depot.

It features scratch built, kit built and ready to run locomotives and rolling stock in 1/29, 1/32 and 10mm to the foot scales.

Thomas Trackway

Stand: Q

The layout is small and compact to run small trains, Thomas and Percy and a few small engines.

It has recently been enlarged for the bigger engines Emily and James which need bigger curves. Some of the locos run on DCC and sound and there is a small circus tent and train. There is plenty to see!

Tyddyn Bach - presented by Martin Shepherd and Warwickshire 16mm scale Modellers Association

Stand: O

Tyddyn Bach is a small layout set to show a small station in North Wales. It was originally conceived to demonstrate that 16mm scale layouts can be compact and easily transported. It fits into a family hatchback. After many visits to the show Tyddyn Bach will be retired after the exhibition to become a permanent indoor layout.

CLUBS

Bromsgrove Society of Model Engineers

Stand: H

Bromsgrove SME is one of the earliest model engineering societies to have tracks for small scale garden railway models. Our 32mm gauge layout was constructed in 1992, and has been in operation for over 25 years. It was joined by a separate 45mm track in 2005, offering facilities for gauge one models alongside our narrow-gauge brethren.

Coventry Model Engineering Society

Stand: D

Our members have interests in all areas of engineering. We are based at Ryton Pools, near Coventry, where we have a 3.5 and 5 inch gauge track and also a 32mm gauge track for members use, with the larger track being used to give train rides every Sunday afternoon Easter to September. Find out more at www.coventrymes.co.uk

Gauge One Miscellany

Stand: B

This is a semi static display of gauge one loco's, coaches & wagons in various scales associated with the Gauge One Model Railway Association. These being 1/32, 1/30.5 and 1/29. Both USA & British railroads/railways are represented. Because of the size of the models it is very much a garden occupation and to put a working layout into most exhibition halls does have its limitations. Therefore, this display gives people an idea of what gauge one is and to endorse it a dvd player is used to show various aspects of what we call get-togethers throughout the land, albeit on a television screen in order to get a flavour of Gauge One.

National 2½" Gauge Association

Stand: G

The National 2½" Gauge Association was formed in 1975 to try and halt the declining interest in this gauge of models. Its aim is to preserve access to articles and existing designs, to encourage new designs, and to supply drawings and castings no longer available from commercial suppliers.
