

THE MIDLANDS GARDEN RAIL SHOW

AN EXHIBITION FOR THE BIGGER GAUGES

LARGE SCALE MODEL RAIL

0 GAUGE, G SCALE, GAUGE 1, 16MM & MORE...

FREE SHOW GUIDE

**SATURDAY 17th &
SUNDAY 18th
MARCH 2018**

Open 10am – 4pm Daily

**WARWICKSHIRE
EVENT CENTRE**

WELCOME

Welcome to the 2018 Midlands Garden Rail Show – Large Scale Model Rail. Over the years the show has grown to become one of the leading model railway events dedicated to garden rail.

We are again pleased to be able to present a diverse range of large scale layouts in various gauges. Some layouts new to the show this year include Chalfont, Walesby and Belbroughton, whilst several old favourites will also be running for your enjoyment.

As you go round the show you will see over 35 specialist suppliers offering a vast array of garden railway products including locomotives, rolling stock, track and accessories. Make sure you try to visit them all to see the full range of products on offer.

We hope you will enjoy your visit. Make sure to try the mezzanine restaurant for breakfast, lunch or tea - whilst still viewing and enjoying the action!

BELBROUGHTON - O GAUGE

WALESBY - G SCALE

16MM MODULAR LAYOUT

The Midlands Garden Rail Show – Packed with action!

LAYOUTS

16mm Association Modular Layout

Stand: J

This layout is built and operated by members of the 16mm Association and is fully modular. Boards and sections are built by individuals and can be assembled in a myriad of ways. We are always looking for new builders and contributors – please join us.

Belbroughton – Western MRS

Stand: E

A Western Region branch-line in the late 1950's in 'O' gauge.

Belbroughton is a village in an area bounded by Kidderminster, Bromsgrove, Longbridge and Stourbridge. In real life the village never had a railway, this is what could have been if the LMS and GWR had built a line into the town.

Chalfont

Stand: M

Chalfont – Gauge 3 – represents a small GWR branch terminus station and goods yard. A regular passenger service is supplemented by freight workings shunting the yard and local dairy. All locos are battery radio controlled and sound fitted. They are built from kits, as is much of the rolling stock. Gauge 3 at 13.5mm/foot is impressive. Chalfont has been built to show that a gauge 3 layout can be constructed in a reasonable space - I hope that you enjoy it.

Dominic's Demos

Stand: K

Some people think that building rolling stock in 16mm scale is difficult. I aim to show that this is NOT the case by sitting and building some simple rolling stock kits. These will be from the less expensive end of the market and will be painted and finished on the stand. There will also be an opportunity for the younger visitors (aged 7 and up) to try their hand at assembling a kit "dry" ...

There may also be a small test track in attendance.....

Fiddlers Green

Stand: R

Fiddlers Green was built in order to show what could be achieved using live steam locomotives in a very small space. The layout includes a small passing station and a wood mill which allows plenty of operational interest as well as the opportunity to smell real steam engines in close proximity.

G Scale Society Publicity Layout

Stand: H

The G Scale Society is a warm and friendly society for large scale modellers and families. We hope to show you our members garden railway to inspire you.

Three Counties Area Group G Scale Layout

Stand: A

Group portable G Scale layout – a project under construction

Gauge One Vintage Tinplate Trains Group

Stand: S

Toy trains from 1900 to 1950. Proprietary makes, most in original pre-1923 grouping liveries. Over forty locomotives with passenger and goods stock. Five or so tracks running continuously on a 30-foot-long layout and six individual collections here combined as one. Questions welcome.

Hampton End

Stand: C

Hampton End was a small branch line link serving a small village (HAMPTON END). Most of the freight that used the line was fish from the quayside. After the closure of the line many years ago, a group of local rail enthusiasts reinstalled the tracks & buildings & purchased a few foreign engines & stock. Most week-ends trains can be seen running. The buildings are from BR days. This international flair works well. Most of the trees are supplied by Ceynix Trees. Buildings are supplied by T&M models. Hampton Halt was added in September 2011 and is a branch line which serves a small village, where it terminates with a run-around loop. Hampton End is sponsored by Glendale Junction and supported by fyna vehicle hire, 01604 753931. Questions are welcome at all times.

Hortus Halt

Stand: D

This is an indoor representation of a garden railway rather than a model railway. We have tried to capture the essence of a garden railway in an exhibition layout in order to encourage others to build their own garden railway. It is light and easily transported.

Ian's British Lego Railway

Stand: Q

A railway built entirely of lego bricks including a large bridge, real lego locomotives and coaches as well as some scratched built (brick built) trains. All are fully working and the layout has various buildings of interest.

Smoghampton

Stand: O

This layout consisting of terminus and circuit of track is designed to present Gauge 2 model railway equipment last made commercially before the First World War. It is the only exhibition layout using this scale and gauge in Britain.

Stanley Midland – Gauge One Layout.

Stand: I

Presented by the Midland Group of The Gauge One Model Railway Association. This exhibition layout is to a scale of 10mm to 1ft. Modelled on a fictitious main line station, during the steam era. The locomotives are mainly live steam, fired by meths or even coal. Enjoy!

Tyddyn Bach - presented by Martin Shepherd and Warwickshire 16mm scale Modellers Association

Stand: P

Tyddyn Bach is a 16mm scale layout depicting a rural Welsh narrow gauge railway. They layout was conceived to demonstrate that larger scale live steam doesn't need a large space to be enjoyable. The layout can be transported in a family car and can cope with engines as large as a Beyer Garratt.

Walesby

Stand: N

"Walesby" is a new layout and is named after the place where our permanent clubrooms are located.

Members run DC, DCC electric and battery locomotives in various scales from 1:32 to 1:19 on 45mm gauge track. Locos from various parts of the world are run.

Locomotives generally have sound, lights and smoke in operation to enhance the experience of real locomotive running.

We do not have fixed scenery but our back scene represents a garden and the dioramas are typical of what members would do in their gardens.

CLUBS

Bromsgrove Society of Model Engineers

Stand: F

Bromsgrove SME is one of the earliest model engineering societies to have tracks for small scale garden railway models. Our 32mm gauge layout was constructed in 1992, and has been in operation for over 25 years. It was joined by a separate 45mm track in 2005, offering facilities for gauge one models alongside our narrow gauge brethren.

Coventry Model Engineering Society

Stand: L

Members have an interest in all things engineering, including model locomotives, traction engines, stationary engines and specialised workshop equipment. The club is based at Ryton Pools near Coventry, where we also give train rides every Sunday from Easter until the end of September. Find out more at www.coventrymes.co.uk

Gauge One Miscellany

Stand: B

This is a semi static display of gauge one loco's, coaches & wagons in various scales associated with the Gauge One Model Railway Association. These being 1/32, 1/30.5 and 1/29. Both USA & British railroads/railways are represented. Because of the size of the models it is very much a garden occupation and to put a working layout into most exhibition halls does have its limitations. Therefore this display gives people an idea of what gauge one is and to endorse it a dvd player is used to show various aspects of what we call get-togethers throughout the land, albeit on a television screen in order to get a flavour of Gauge One.

National 2½" Gauge Association

Stand: G

The National 2½" Gauge Association was formed in 1975 to try and halt the declining interest in this gauge of models. It's aim is to preserve access to articles and existing designs, to encourage new designs, and to supply drawings and castings no longer available from commercial suppliers.
